RESTON, VIRGINIA 22092

// Note: The feature class terms and abbreviations found in this Alphabetical Finding List consist of eight or less letters and were chosen for computer search and retrieval purposes. They do not necessarily represent balanced, exclusive, or accurate terminology for the identification of all kinds of cultural and natural features. Although some of the terms may agree with dictionary definitions, they represent more generalized and nonspecific categories. Commonly used generic names are listed at the end of each entry to assist in understanding the range of cultural and natural entities represented by the feature class term. A plural form is listed as if it were singular; i.e., "archipelago" or "islands" would be categorized as "island".

- airport - man-made facility maintained for the use of aircraft; airfield, airstrip, landing field, landing strip.
- arch - natural arch-like opening in a rock mass; bridge, natural bridge, sea arch.
- area - any one of several areally extensive natural features not included in other categories; fan, badlands, barren, delta, garden.

arroyo - watercourse or channel through which water may occasionally flow; wash, gulley, coulee, draw.
- bar - natural accumulation of sand, gravel, or alluvium forming an underwater or exposed embankment; sandbar, spit, reef, ledge, shoal.

basin - natural depression or relatively low area enclosed by higher land; sink, pit, amphitheater, cirque.
- bay - indentation of a coast or shore line enclosing a part of a body of water; a body of water partly surrounded by land; arm, bight, cove, estuary, gulf, inlet, sound.

beach - the sloping shore along a body of water that is washed by waves or tides and is usually covered by sand or gravel; shore, strand, coast.
- bench - area of relatively level land on the flank of an elevation such as a hill, ridge, or mountain where the slope of the land rises on one side and descends on the opposite side.
- bend - curve in the course of a stream and/or the land within the curve; a curve in a linear body of water; meander, bottom.
- bldg - building, a man-made structure with walls and a roof for protection of people and/or materials but not including a church, hospital, or school (q.v.).
- bridge - man-made structure carrying a trail, road, or other transportation system across a body of water or depression; overpass, trestle.
- canal - man-made waterway used by water craft or for drainage, irrigation,

mining, or water power; ditch, lateral.

cape - projection of land extending into a body of water; point, peninsula, neck.

— cave - natural underground passageway or chamber, or a hollowed out cavity in the side of a cliff; cavern, grotto.

— cem - cemetery, a place or area for burying the dead; burial, grave, burying ground, memorial garden.

channel - linear deep part of a body of water through which the main volume of water flows and is frequently used as a route for water craft; passage, thoroughfare, thoroughfare, strait, reach.

— church - building used for religious worship; chapel, synagogue, mosque, tabernacle, temple.

— civil - a political division formed for administrative purposes; county, borough, town, township.

— cliff - very steep slope; bluff, crag, precipice, head, headland, nose, palisades, promontory, rim, rimrock.

crater - circular-shaped depression at the summit of a volcanic cone or one on the surface of the land caused by the impact of a meteorite; a man-made depression caused by an explosion.

— dam - water barrier or embankment built across the course of a stream or into a body of water to control and/or impound the flow of water.

— falls - perpendicular or very steep fall of water in the course of a stream; waterfall, cataract, cascade.

— flat - relative level area within a region of greater relief; playa, clearing, glade. *bottom*

— forest - bounded area of woods, forest or grassland under the administration of a political agency (see woods); national forest, national grasslands, state forest.

— gap - low point or opening between hills or mountains or in a ridge or mountain range; pass, notch, water gap, wind gap, saddle, col.

geyser - eruptive spring from which hot water and/or steam and in some cases mud, are periodically thrown.

glacier - body or stream of ice moving outward and downslope from an area of accumulation; an area of relatively permanent snow/ice on the top of or side of a mountain or mountainous area; ice patch, snow patch, icefield.

— gut - relatively small coastal waterway connecting larger bodies of water or

*this term also
includes rapids
in Ky.*

other waterways; slough, creek, inlet.

harbor - sheltered area of water where ships or other water craft can anchor or dock; port; roads, roadstead.

— hosp - hospital, building where the sick or injured may receive medical or surgical attention.

— island - area of dry or relatively dry land surrounded by water or low wetland; isle, isla, rock, archipelago, atoll, key, cay, hammock, hummock.

we use "Island" in another sense too

isthmus - narrow projection of land in a body of water connecting two larger land areas.

— lake - natural body of inland water; pond, backwater, lagoon, laguna, pool, resaca, lac, waterhole.

we also use this term for artificial bodies of water

lava - formations resulting from the consolidation of molten rock on the surface of the earth.

— levee - natural or man-made embankment flanking a stream; bank.

— ? locale - place at which there is or was human activity; it does not include populated places (ppl), mines, and dams; railroad siding, station, junction, site, camp, landing, battlefield, crossroad, ranch, farm, windmill, tower, ruins, ghost town.

each one designator terms

— military - area administered and used by U S or State armed forces for military purposes; air force base, air facility, air station, army post, marine corps base.

Camp —

— mine - place or area from which commercial minerals are or were removed from the Earth; not including oilfield; shaft, quarry, pit.

— oilfield - area where petroleum is or was removed from the Earth.

— other - category for miscellaneous named man-made entities that cannot readily be placed in the other feature classes listed here.

— park - place or area set aside for recreation or preservation of a cultural or natural resource and under some form of governmental administration; not including forest; national park, state park, national historical landmark, wilderness.

— pillar - vertical-standing, often spire-shaped, natural rock formation; pinnacle, chimney, monument, rock, tower.

these are specific to

plain - a region of general uniform slope, comparatively level and of considerable extent; grassland, highland, upland, plateau.

— ppl - populated place; place or area with clustered or scattered buildings and a permanent human population; city, village, settlement, town.

- range - chain of hills or mountains; a somewhat linear complex mountainous or hilly area; cordillera, sierra.
- rapids - fast-flowing section of a stream, often shallower and with exposed rock or boulders; ripple, riffle. *falls*
- ridge - elevation with a narrow, elongated crest which can be part of a hill or mountain; rim, crest, cuesta, escarpment, hogback, spur.
- school - building or group of buildings used as an institution for study, teaching, and learning; academy, high school, college, university.
- sea - large body of salt water; gulf, ocean.
- slope - a gently inclined part of the earth's surface; pitch, grade.
- spring - place where underground water flows naturally to the surface of the Earth; seep.
- stream - linear body of water flowing on the Earth's surface; creek, river, anabranch, distributary, branch, run, slough, bayou, pup, brook, fork, kill, rio.
- summit - prominent elevation rising about the surrounding level of the Earth's surface; it does not include ridges and ranges; hill, mountain, knob, butte, berg, colina, cone, volcano, cumbre, dome, head, knoll, mesa, meseta, mesita, mound, mount, peak, rock, sugar loaf, table, bald, cerro, horn. *We call this an elevation*
- swamp - poorly drained wetland, fresh or saltwater, wooded or grass possibly covered with open water; marsh, bog, cienaga, marais, pocosin.
- tank - artificially impounded body of water; reservoir, lake. *Pond we include this & natural lakes*
- trail - route for passage from one point to another; it does not include roads or highways (categories of entities not included in this alphabetical finding list); ski trail, jeep trail, path.
- tunnel - linear underground passageway open at both ends.
- valley - linear depression in the Earth's surface that generally slopes from one end to the other; canyon, barranca, chasm, cove, draw, glen, gorge, gulch, gulf, hollow, ravine.
- well - man-made shaft or hole in the Earth's surface used to obtain fluid or gaseous materials.
- woods - small area covered with a dense growth of trees; does not include an area of trees under the administration of a political agency (see forest).

- * Indicates the presence of a diacritical mark within the name
